DETAILED ACTION

1. This Office action is a complete supplemental action. Claims 1-19, 21-46 and 54-65 are pending. The restriction mailed 05/21/03 omitted claims 5-6. The present restriction addresses the omitted claims and attempts to provide a more accurate classification.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121: 1-19, 21-30 \$ \$\frac{1}{2} 60
 - Claims 1-30 and 47-60, drawn to a television distribution system having a set-top box receiver/decoder, classified in class 725, subclass 25.
 - II. Claims 31-46 and 61-65, drawn to a plural block memory device, classified in class 711, subclass 5
- 3. The inventions are distinct, each from the other because of the following reasons: Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as in a virtual memory device. See MPEP § 806.05(d).
- 4. Inventions of Group I and II are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes or operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01). In

the instant case the combinations as claimed presently exhibit conditions (2), (3), and (4).
